

COMP 506, Spring 2018  
Project 1 Questionnaire

Name: \_\_\_\_\_peisheng guo\_\_\_\_\_

NetId: \_\_\_\_\_pg23\_\_\_\_\_

1. Briefly discuss your experience building the scanner and parser. What things were easy to do? What things were hard?

ANS:

Easy part would be copy the syntax and morphology from demo documentation.  
Hard part is writing error functions.

2. Are there topics that we should cover in class to better prepare you for this project?  
Sure. Helps a lot.

3. What, if anything, would you do differently if you could start over on this project?  
Read less on the tutorial. Some parts are not needed for the assignment.
